

# IPTV Smarters Installation Instructions

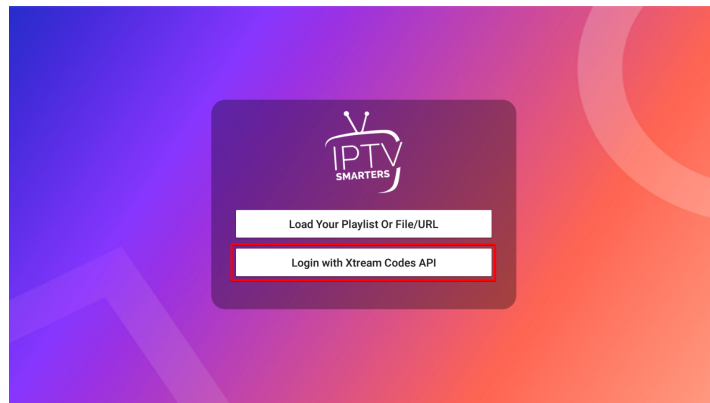

## Android

1. Download Fire DL from the App store and install.
2. Open Fire DL and enter 043249 in the File URL Line
3. Hit the download icon and this will start to install.

## Smarters Pro

4. Open the Application and click on Log In With Xstream API.

5. On the information you will need to add the below details

 The image displays the 'Enter Your Login Details' form within the IPTV SMARTERS application. The form is set against a purple and blue gradient background. It includes the IPTV SMARTERS logo on the left. The form fields are: 'provider name', a username field containing 'Yhh898sVr', a password field with masked characters '\*\*\*\*\*', and a URL field with the placeholder 'Enter the URL Provided in your account setup email'. Below these fields is a white 'ADD USER' button. At the bottom left of the form area is a 'List Users' link with a user icon.

Name --- Magic

Username --- (Your username provided)

Password --- (Your Password Provided)

Portal URL --- <http://illusion-hosting.ddns.net>

6. Hit add user and this will take you to the user information page where your profile will show in a white box.

7. You will now be on the Main menu page.

8. Go into Live TV and your channels will start to update. If this does not happen on the top right click the 3 dots and update from there.

9. Now you will need to update the EPG to do this press the back arrow to go back to the Main Menu and click on the Live EPG Section this should automatically update the EPG. If not click on the 3 dots in the Menu and do this from there.

That's it you are all set to go choose your preference of where you would like to watch Live TV from as there 2 Live TV or Live EPG!

## **Movies & TV Series**

To access the 1000s of Movies and TV Series it very easy to use please follow the below.

1. Click on Movies this will take you to the category page
2. Click on a category which will open up the library within the category.
3. Click on the selected Title and play.

## **Troubleshooting**

### **Live TV, Movies, TV Series**

Video and Audio sync issues.

On the Main page go to the settings cog on the top of the page and click OK.

This will take you into the menu.

Click on Media Player and change to Hardware. (Normally set on Software) Native is also another option.

This will also help if you are experiencing similar issues with Movies and TV Series.

### **Using External Players!**

#### **Movies/Tv Series**

If you experience video not playing but have sound or vice versa. Use the following players to help!

MX Player – Can be downloaded through fire DL Ask your provider for a code

VLC Player - Can be downloaded through fire DL Ask your provider for a code

Once the players are installed into your firestick or Android Box you don't need to do anything else with them.

To use these Players whilst using Smarters follow the below.

### **Live TV**

Go into the Live tv section. When you are about to select your channel press and hold the centre button/OK. A Menu will now appear this will have the option to use either of the players.

Just highlight the selected player and press ok. This will then take you into the player to play the stream

### **Movies TV Series**

When entering the Movies section highlight the titled Movie you plan to watch. Then Press and hold the Centre/OK Button. This again will bring up an options menu with the highlighted players. Select the one you wish to watch the movie on.
